**SILVER SERVICE
PRESENTED LAMB**

Parting Tribute From His Colleague's on House Committee of Agriculture.

(Special to The Times-Dispatch.) Washington, March 1.—A beautiful silver coffee and tea set of six pieces was presented to Representative John Lamb, of Iowa, a Republican, made chairman of the House Committee of Agriculture, by his Democratic and Republican colleagues in that committee.

The gift was a parting tribute to the retiring chairman of the committee, and a mark of esteem by his fellow Congressmen. The presentation took place in the Agricultural Committee room.

Members of the committee gathered there, and a few minutes later one of them went to Captain Lamb's private office and told him he was wanted in the committee room. Congressman Hagen, of Iowa, a Republican, made the presentation.

**GOVERNOR DELAYS
ALLEN DECISION**

Has Made No Statement Regarding Disposition of Appeals for Commutation.

MUCH SPECULATION RESULTS

May Mean Favorable Action or May Preclude Further Efforts for Prisoners.

Governor Mann made no decision yesterday on the appeals for commutation of sentence for Floyd Allen and Claude Swanson Allen, who are sentenced to death in the electric chair next Friday for the murder of William M. Foster, attorney for the Commonwealth of Carroll County, in the Hillville Courthouse tragedy of March 14, 1912. The Governor was at his office in the Capitol until a late hour, probably working on a public statement in connection with the case, but he did not complete it, or, at least, did not make it public.

At no time since the petitions for commutation were submitted to him has he made any statement as to his decision. Surmises as to the result, and as to the time he would make his opinion public, have been mere guesses. It is possible that he finished his work last night, and has it ready for publication to-morrow morning. Or, he may make no statement at all and take no action.

Has Waited Month. More than a month has elapsed since the Governor heard what would stand to be final argument in behalf of the Allens. That was on February 1, when attorneys for the Allens and for their friends made appeals for commutation of sentence to imprisonment for life. The arguments were made behind closed doors. The Commonwealth was not represented. The conclusion of the hearing, the matter was left with the Governor, who has kept uniformly quiet on the subject. He has admitted two or three visitors who wished to talk with him about the Allens and in their behalf, but in the main he has discouraged conversation regarding the affair.

In the meantime, the two condemned men have but five more days to live under the terms of the latest reprieve, which was the third since their conviction.

Differently Interpreted. The delay in taking action on the petitions has caused much comment, and there has been a great deal of speculation as to what it means. Those who have been about the Capitol know that the Governor has been extremely busy in many matters, largely with settlement of the Richmond, Fredericksburg and Potomac Railroad tax situation, with making speeches and with discharging his duties as chairman of the reception committee of the conference for Education in the South. But, it is agreed, these things do not account for the postponement of a decision. If the Governor would have sufficed for a verdict from him at any time.

On the one hand, it is argued that the delay is a great deal of speculation as to what it means. Those who have been about the Capitol know that the Governor has been extremely busy in many matters, largely with settlement of the Richmond, Fredericksburg and Potomac Railroad tax situation, with making speeches and with discharging his duties as chairman of the reception committee of the conference for Education in the South. But, it is agreed, these things do not account for the postponement of a decision. If the Governor would have sufficed for a verdict from him at any time.

But, on the other hand, it is felt that by putting off a decision he has spared himself repeated attempts to get favorable hearings, which may have felt would have followed an early disposition of the case. The persistence of some of the friends of the Allens has perhaps made him think he would continue to be pursued even after a final judgment had been given by him to the public. By delaying until today, he has possibly obviated such productions of real or so-called evidence and further attempts to get his consideration of phases of the killing. He leaves at noon for Washington to attend the inaugural ceremonies and will probably be absent for several days—perhaps until nearly the time set for the execution.

**Pimples Source
of Great Danger**

May be Means of Absorbing Disease Germs in Most Unexpected Manner.

The research laboratory of The Swift Specific Co. has collected a vast amount of information regarding the spread of blood diseases. In thousands of instances the most virulent types have been the result of coming in contact with disease germs in public places, and the apparently insignificant pimple has been the cause. It spreads with astonishing rapidity, often infecting the entire system in a few days.

It is fortunate, however, that there is a remedy to cope quickly and thoroughly with such a condition, and thanks to the energy of its producers the famous S. S. may not be had at almost any drug store in the civilized world.

This preparation stands alone among specific remedies as a blood purifier. It is somewhat revolutionary in its composition, since it accomplishes all that was ever claimed for mercury, iodine, arsenic and other destructive mineral drugs, and yet it is absolutely a purely vegetable product. There are more cases of arthritis, rheumatism, locomotor ataxia, paresis, neuritis and similar diseases resulting from the use of minerals than from disease germs direct. These facts are brought out in a highly interesting book "The Swift Specific," which is being distributed with a special letter of advice to all who are struggling with a blood disease. Get a \$1.00 bottle of S. S. S. today of your druggist. It will surprise you with its wonderful action in the blood.

ATTENTION FARMERS: We Offer Five, Ten and Twenty Acre COMBINATION FIG AND PECAN ORCHARDS

There is probably no other kind of farming that will give so quick, so sure and yet so lasting returns as a combination fig and pecan orchard. Pigs begin to bear the second year, and if properly pruned, will bear vigorously for a life-time, and the pecan, though not commencing to fruit much before the seventh year, will continue to increase in bearing for generations.

The growing of vegetable crops between the tree rows is highly recommended as beneficial to the orchard, and a good profit may be realized the first two years by raising tomatoes, peppers, melons, cucumbers, beans and other truck.

The third year the figs should pay a profit of \$300.00 per acre, and increase steadily each year thereafter until each acre brings in between \$700.00 and \$1,000.00 per year.

Then think of the pecans, 27 trees to the acre, each of which trees can be counted on to produce \$30.00 worth of nuts by the tenth year, which amounts to \$810.00 income from an acre. There are many pecan trees which bear 200 pounds of nuts that sell for 60 cents a pound. An acre of such trees would bring its owner \$3,240.00 per year.

**SCHEME APPROVED
BY COL. GOETHALS**

Building of Ocean Jetty Off Newfoundland Banks Will Be Pushed in Congress.

(Special to The Times-Dispatch.) Washington, March 1.—The plan originating with Carroll L. Riker, a New York engineer, to build an ocean jetty off the Newfoundland Banks, to prevent the mingling of the Labrador current with the Gulf Stream until they reach mid-ocean, was approved to-day by Colonel George M. Goethals, chief engineer of the Panama Canal.

By this method, it is believed, icebergs will be made a thing of the past, the climate of Eastern Canada will be made much warmer, and the late springs in the northeastern part of the United States will continue in history only. The bill which incorporates the proposed jetty, now before the House Committee on Naval Affairs, is to be revived at the special session of Congress. It has been approved also by Brigadier-General W. H. Hixby, United States Army, chief of engineers; George P. Cooper, naval hydrographer; O. M. Tittman, superintendent of the Coast and Geodetic Survey; and H. M. Smith, acting commissioner of the Bureau of Fisheries. The jetty or peninsula of land will extend 200 miles into the ocean. It will taper from about forty miles in width at the shore end to three at its eastern extremity, and will cover an area of more than 1,000 square miles. Mr. Riker estimates the cost of this work at \$20,000,000.

Turkey Requests That Peace Be Concluded Advantageously as Possible.

(Special Cable to The Times-Dispatch.) London, March 1.—Abandoning its prohibitive stipulations, the Ottoman government has placed its cause in the matter of peace with the Balkan allies entirely in the hands of the European powers. The notice came to London to-day and contained the request that peace be concluded as advantageously as possible. It is now believed that direct peace negotiations will be resumed speedily, unless Turkey again changes her mind before the negotiations can be concluded.
